## MAY FORFEIT CHARTER

Texas Railroad Commission Is After the Charter of the International and Great Northern.

Austin, Texas, Aug. 14.—It became known today that the Railroad Commission has been considering the advisability of instituting proceedings to forfeit the charter of the International and Great Northern railroad, and that Chairman Mayfield favors such a move. Commissioner Storey was not satisfied as to the proper course, and has submitted some questions to the attorney general for solution. The matter is in the hands of Assistant Attorney General Pollard, who has just returned from Washington, and has not had time to answer the queries.

From Commissioner Storey was secured extracts from his letter submitting the questions to the attorney general, and the status of affairs is gleaned from them. It contains a statement to the effect that upon receipt of the notice from Clerk Maynard of the United States circuit court at Dallas that receiver's certificates had been issued by the receiver and allowed by the court, Chairman Mayfield made the following notation on the papers: "I move that the attorney general be instructed to intervene and protest against this, and insist on compliance with orders and that he forfeit the charter of the International and Great Northern."

Judge Storey said: "I made the fol-

lowing indorsement: 'I vote no. I see no reason for it.' These indorsements are not dated, and I returned the papers to my associates, with my indorsement thereon, for such action as they might see proper to take. They are today returned to me with Commissioner Colquitt's indorsement as follows:

"Better find out first if the attorney general will bring such a suit. So far as a receiver is concerned, the one now in charge of this property, Judge T. J. Freeman, is eminently satisfactory to me."

O. B. Colquitt.  
"You will note that copies of orders are attached issued by the court. I inclose all papers and respectfully ask your careful investigation thereof, and that you advise us:

"1. Whether or not there appears to be grounds for an intervention on the part of the commission?

"2. What cause, if any, there is for forfeiture of the charter of the International and Great Northern Railroad company?

"3. And if so, should it or could it be done by an intervention in that suit for that purpose?"

#### ENGINES COLLIDE—SIX INJURED.

Engineer and Five Passengers Required Services of a Doctor.

Yoakum, Texas, Aug. 14.—At about 7:15 this morning the Sap's regular passenger train from Corpus Christi to Waco, pulled by engine No. 35, with Engineer A. J. Fetterly in charge, met a freight in a head-on collision

about five miles west of Yoakum. A relief train carrying doctors and officials of the road was immediately dispatched to the scene and brought the injured into this place, also transferring the other passengers, mail and baggage.

The passenger train was coming around a curve and could not see the freight, which fortunately had stopped to repair a defective airbrake, and crashed into the freight at the speed of about thirty miles an hour. After reversing his engine and applying the air, Engineer Fetterly jumped and was seriously injured internally by the fall, how badly cannot be learned at this time.

Five passengers were injured badly enough to need the services of physicians at this place, while many more were injured by flying glass and received bruises of a minor nature.

Both engines were badly torn up and were brought into the shops here for repairs.

A mistake in orders whereby the passenger train took it for granted that a train on the sidetrack was the one it had orders to meet caused the wreck.

Mrs. C. B. Harmon of Waco is hurt about the neck and is being cared for by the company. She was accompanied by her husband.

G. W. Allen of Ottine has a contusion on the temple and cheek.

C. T. Leonard, a Pullman car porter, had his arm broken.

S. G. Elliott of Shawnee, Okla., suffered serious injury to his back.

Several others were slightly injured, but declined to give their names.

The cause of the accident could not be learned further than that the passenger crew must have gotten their orders confused.

None of the coaches or box cars left the track, but the engines were tele-scoped.

#### Fell 110 Feet.

Cameron, Texas, Aug. 14.—Near Milano, Paul Mallie fell into a mining shaft yesterday afternoon a distance of 110 feet, but regained consciousness when recovered and lived till noon today. He pushed a car into the shaft, thinking the cage as there to receive it. The car went to the bottom and Mallie went with it.

#### Work Progressing Rapidly.

Work on the swimming pool to be erected by the local Y. M. C. A. is progressing nicely, and it is likely that the walls of the building will be well up by this time next week. The pool will be rushed to an early completion.
